

# INFRASTRUCTURE OPTIMISATION SERVICES

Maximise your investment in IT

Technology platforms that operate at optimum capacity and capability, fuel growth by driving up productivity and increasing return on capital expenditure. However, it's often the case that server application and data is spread across multiple data centres, departments and geographies. This makes it difficult to map business needs against existing capability and can result in inefficient systems operations and higher than necessary costs.

## Journey to a dynamic IT infrastructure

Sogeti's Infrastructure Optimisation Services offer structured, systematic processes for assessing an enterprise's application infrastructure as part of a roadmap to create a dynamic, productive, and profitable working environment.

Our services will help you derive maximum efficiency from your Microsoft-based IT estate including Azure, Windows, Office and SQL. Evaluating existing infrastructure against the needs of your business, we'll highlight capability and underutilisation gaps as well as identifying compliance issues you may not be aware of, helping you to:

- Utilise existing infrastructure to create the optimal business IT environment
- Provision migration of applications between Microsoft Azure and on-premise servers to offer security and mobility in equal measure
- Consolidate applications and maximise utilisation for greater business productivity at reduced cost

You'll be left with a plan to create and manage a sustainable, flexible infrastructure environment that enables you to make the best use of your Microsoft technology. It will also allow you to take advantage of technology movements such as BYOD, private, hybrid and public Cloud, and real-time BI.

Through Sogeti's Optimisation Services, your organisation can experience an IT infrastructure that not only delivers efficiency, but provides the functionality necessary to achieve your business goals.

### Core infrastructure

Simplify core infrastructure to enable a flexible, more efficient and less costly operating environment

### Business productivity

Streamline existing systems to increase the effectiveness and value of key functional supporting software

### Application platforms

Increase the value of each user by providing fast, easy access to connected operating applications

## A structured, systematic approach to infrastructure optimisation

As part of this service Sogeti provides a structured process for assessing an enterprise's application infrastructure as a roadmap to create a dynamic, productive, and profitable working environment.

## Helping you achieve more with less

IT optimisation allows organisations to respond quickly to changing business priorities and align their IT infrastructure with the strategic goals of the company, to deliver:

- Better server and storage use
- Less server and application redundancy
- Cost savings as a result of automated provisioning
- IT asset utilisation aligning with business requirements

“Deploying SQL Server 2014 in the cloud gave us a way to get in front of the curve and try out the latest SQL Server feature set and use it in a POC, while at the same time giving us the experience of cloud-based deployment.”

*Steve Wiggs*

*Senior Director of Software Development  
MedAssets*

## Fuel business growth

Delivering effective, connected, end-user IT on a unified platform presents an opportunity to transform businesses from the inside out, reshaping the value being delivered. For companies that are able to optimise their infrastructure, IT becomes an important asset in their arsenal to retain control, gain competitive advantage, and harness the power of new technology, so you can:

- Leverage the power of the cloud and reduce your time to market
- Unlock the power of big data and gain greater customer insight
- Enhance data security and minimise the risk of data loss
- Upgrade and tweak what you have to increase operational efficiency
- Introduce desktop and application virtualisation to create a smarter, flexible workspace
- Maximise datacentre effectiveness and ROI

## Sogeti and Microsoft

By combining innovative Microsoft solutions with our service excellence, we're able to offer extensive proven experience in IT infrastructure services that deliver real business value. Together we can define a roadmap that will consolidate your servers and applications to create the most efficient IT infrastructure possible, giving you a truly flexible, scalable working environment.

## Award winning expertise
