# Sogeti DevOps Services

Supporting you Throughout

your DevOps Journey

## The Drive for Better, Faster, More Cost Effective IT

Organisations with a mature DevOps strategy are deploying code 30 times more frequently than their competitors and getting their code into production 200 times faster.<sup>1</sup>

With customer expectations at an all-time high, the most successful businesses are working towards four main goals: faster time to market, flexible scalability, sustainable working, and maintaining an excellent brand reputation. To achieve these goals, you need a DevOps strategy that enables your Business, Development, Operations, and Testing teams to collaborate in a way that breaks down silos and aligns individual goals with those of the business.

With greater collaboration, DevOps enables you to get new features and products to market faster, with fewer bugs, improved customer feedback, more time for optimisation and greater cost savings that can be invested elsewhere in your business. However, after adoption and initial success, many businesses are finding it a struggle to fulfil their DevOps potential.

## A Trusted Partner to Support You

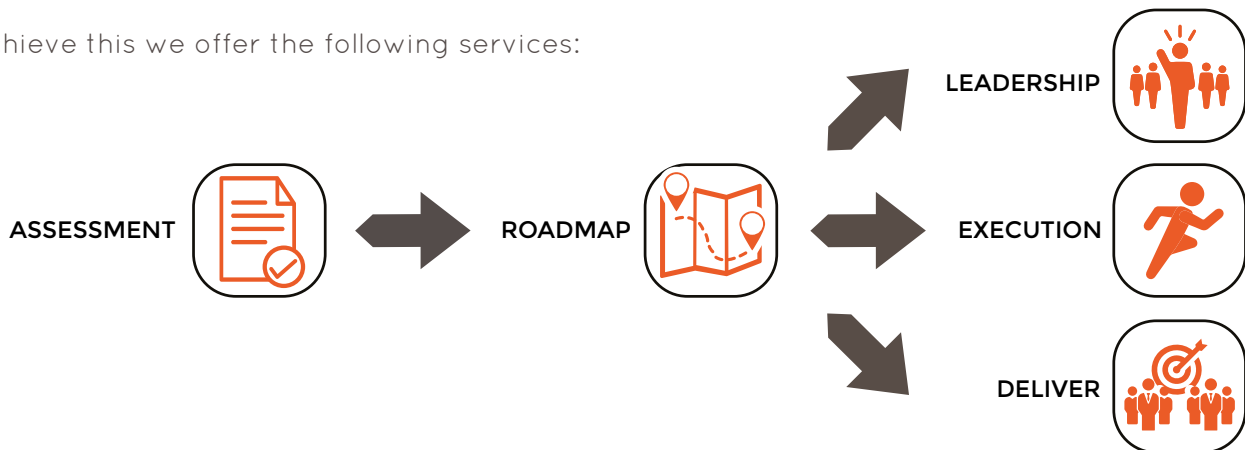

DevOps is a positive disruptor that can impact all of your established processes, role definitions, reward systems, governance models and technology deployments. This makes it extremely difficult and potentially expensive to try to grow your DevOps capability internally without expert guidance. The best way to mitigate risk and ensure a successful DevOps transformation is to work with a trusted DevOps consultancy. Working with a partner to define a roadmap and ensure a robust execution across your business, ensures you can remain focused on your core values and goals and dedicate all of your internal resources to business critical tasks.

Sogeti's DevOps solutions enable you to drive successful transformation at every stage of your DevOps journey. For clients commencing a new DevOps initiative, we first run a readiness and capability assessment to determine the most effective roadmap for change and select the best enterprise metrics to facilitate continuous improvement. If you have already begun your DevOps journey and want to take it to the next level, we can implement a maturity assessment and recommend the next steps to accelerate your transformation.

Sogeti will oversee the implementation and optimisation of each of the three key elements of your DevOps transformation. We will help you select best in class tools, furnish your team with the right skills and fine tune your processes to bridge silos, work in a more collaborative way and achieve the cultural change that reinforces DevOps thinking.

1. 2016 State of DevOps Report, Puppet Inc.

To achieve this we offer the following services:

**Leadership:** Our evangelists look at DevOps from the different perspectives, goals and emotional drivers of your Development, Operations and Testing teams. We engage with your executive leaders to facilitate a better understanding of DevOps culture, create a DevOps vision to meet your specific business needs and create a clear definition of performance and success.

**Execution:** Once the roadmap is defined, Sogeti determines your gaps in expertise and deploys expert staff to work alongside your existing team to execute on your initiatives, so that you can scale up and down based on your requirements.

**Deliver:** An end-to-end fully customisable, managed service where we take on the responsibility of DevOps at an enterprise or program level. By working in this way we can embed continuous improvement and innovation from the outset, and we can create strategic value through the transformation of your DevOps capability.

## Why Partner with Sogeti?

**Quality:** Sogeti has the expert staff, proven frameworks, streamlined processes and cutting edge tools necessary to drive successful adoption of DevOps across your whole enterprise. We have a proven ability to drive up quality as we have created some of the most widely used industry standard testing methodologies, TMAP®, TPI® and PointZERO®. We have also developed many other notable frameworks that enable businesses to accelerate automation and application development. Together with our parent company Capgemini Group, Sogeti was positioned as a leader in Gartner's 2015 Magic Quadrant for Application Testing Services, Worldwide<sup>2</sup>.

**Capability:** As a wholly owned subsidiary of the Capgemini Group, we have a global footprint with DevOps at the heart of our consulting and service offerings. This gives us access to a shared wealth of knowledge of client-driven solutions designed to boost profitability, growth and innovation. By drawing on the extensive experience we have across platforms, applications and devices, as well as partnerships with industry-leading technology vendors, we can help our clients to deliver high quality complex projects, on time and on budget.

**Trust:** We offer our client's best in class tools, highly experienced professionals, with appropriate security clearance where necessary, and the expertise to help you to create an environment that fosters innovation and delivers results. We have a strong track record of helping our clients to meet their objectives and delivering results that exceed their expectations.
